

Apprenticeship and Industry Training

IMPORTANT

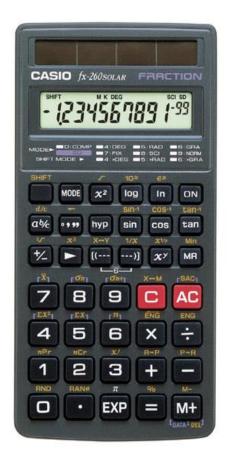

Due to increasing concerns about the security of exams, Alberta Apprenticeship and Industry Training now supplies all exam candidates with a calculator.

<u>Personal calculators are not permitted.</u> <u>No exceptions will be made</u>.

The calculator is a solar-powered Casio FX-260 scientific model as shown here. The FX-260 provides all the basic and scientific functions required for most trade exams. Instructions on the use of the various functions are provided below.

Calculator Use Instructions

Note: To switch from the number or symbol on a black button to the orange function above the button, press the **SHIFT** key.

- Basic e.g., 18 multiplied by 3.6
- ____
- . 6 =
