

## Glossary of Terms

The following glossary is a list of terms commonly used in the trade in Alberta and elsewhere in Canada. Individuals preparing for examinations should be familiar with these terms and how they are used in the context of the trade.

|                            |                      |                         |
|----------------------------|----------------------|-------------------------|
| "Canada Number One"        | Internodes           | Reclamation             |
| "Hardening off"            | Lateral bud          | Reproductive maturation |
| "Law of the Minimum"       | LD <sub>50</sub>     | Rhizome                 |
| Backflow prevention device | Macro-nutrients      | SAR                     |
| Bid bond                   | Meristematic tissues | Scaffold branch         |
| Buffering capacity         | Micro-nutrients      | Scion                   |
| Cambium                    | Mixture ratio        | Security deposit        |
| Cation exchange            | Monocot              | Soil aggregates         |
| Chlorosis                  | Monocot flowers      | Soil salts              |
| Dicot flowers              | Morphology           | Soil structure          |
| Double leader              | Mottled              | Surge pressure          |
| Electrical conductivity    | Nitrogen cycle       | Tree calliper           |
| Fertilization              | Nutrient ratio       | WHMIS                   |
| Germination                | pH                   | Xylem                   |
| Girdling                   | Phloem               |                         |
| Grafting                   | Pollination          |                         |
